FOREWORD

To The Trade:

With the offering of this our No. 18 COMMERCIAL CATALOG our first hope and request is that you read this page very carefully as it contains general information as to its contents. *Thanks.*

In this CATALOG we have illustrated a general line of COMMERCIAL as well as a better grade of Conventional Designs in Standard Periods of Architecture for use in CHURCHES, SCHOOLS, BANKS, OFFICE BUILDINGS, HOTELS, STORES, and a few for RESIDENTIAL purposes.

WE PARTICULARLY CALL YOUR ATTENTION TO THE FOLLOWING ARRANGEMENT

PAGE

1 TO 4 . . GUTHLITES with their many new features in the form of a totally enclosed unit.

. . 5 . . . . The NEW STANDARD BRASCOLITE Unit.

6 TO 12 . . ORNAMENTAL BRASCOLITES for CHURCHES, BANKS, and other PUBLIC BUILDINGS in various Architectural Periods.

13 & 14 . . ORNAMENTAL "COMPO" FIXTURES for general use.

15 & 16 . . AGLITES for RESIDENTIAL, COMMERCIAL, and HOSPITAL use.

. . 17 . . . . RECESSED CEILING LIGHTS and BRACKETS.

. . 18 . . . . HOSPITAL SPECIALTIES, OPERATING ROOM LIGHTS, etc.

. . 19 . . . . PORCELAIN ENAMELED INDUSTROLITES, and ACCESSORIES for Factory and other uses.

. . 20 . . . . PORCELAIN ENAMELED PENDANTS, CEILING LIGHTS, and GUTH REFLECTOR FLANGE.

. . 21 . . . . PORCELAIN ENAMELED SWITCH PLATES for all Standard Switches.

PAGE

. . 22 . . . . GYMNASIUM FIXTURES protected by WIRE GUARDS in various types and sizes.

. . 23 . . . . PORCELAIN ENAMEL and BRASS COMMERCIAL CEILING LIGHTS.

. . 24 . . . . EXIT LIGHTS (Standard Types)

. . 25 . . . . COMMERCIAL CEILING LIGHTS and BRACKETS for general use.

. . 26 . . . . DESK LAMPS, PORTABLES and COUPON BOOTH BRACKETS.

. . 27 . . . . CAGE LIGHTING EQUIPMENT

. . 28 . . . . BORDER LIGHTS, PROSCENIUM ARCH, BULLETIN BOARD, SHOW CASE, and COVE REFLECTORS.

29 & 30 . . An assorted line of PENDANTS with diversified Ornamentation and Glassware.

. . 31 . . . . RESIDENTIAL SPECIALTIES.

. . 32 . . . . STREET LIGHTING UNITS & Price List covering GLASSWARE, WIRE GUARDS, and other miscellaneous items.

For your information as to Finishes recommended, which we have indicated under our design by number only, we are listing below these numbers and their accepted Trade names. UNLESS OTHERWISE SPECIFIED Fixtures will be furnished in the Finishes recommended:

C-6 French Gold (Sprayed)	F-142 Olive Green	F-374 Oiled Bronze
C-7 Verde Gold	F-170 Leather Bronze	F-391 Bank Bronze (Plated)
F-12 Tusk Ivory	F-206 Ivory and Poly	F-485 Bank Bronze (Enamel)
C-17 Sprayed Old Bronze	F-305 Hibernia Bronze	F-544 English Gothic
F-22 Brushed Brass	F-333 Old Bronze and Poly	F-557 Sprayed Antique Bronze
F-59 Statuary Bronze	F-364 French Gold	F-599 Waxed Iron & Spanish colours

All prices in this CATALOG contemplate our furnishing the material complete with exception of electric lamps, wired and assembled as far as practical for safe transportation, no boxing charge, F.O.B. Factory.

If Glassware other than illustrated is wanted, the correct price can be arrived at by deducting price of the Glassware illustrated, (referring to price list on page 32) and adding in lieu the Glass wanted which will give you the list of the complete Fixture.

TERMS: To concerns of satisfactory credit rating—1% Fifteeen Days, Net Thirty Days.

On DESIGNS which appeared in PREVIOUS CATALOGS under OTHER numbers and are NOW shown in THIS BOOK, the prices listed herein SUPERSEDE all previous issues.

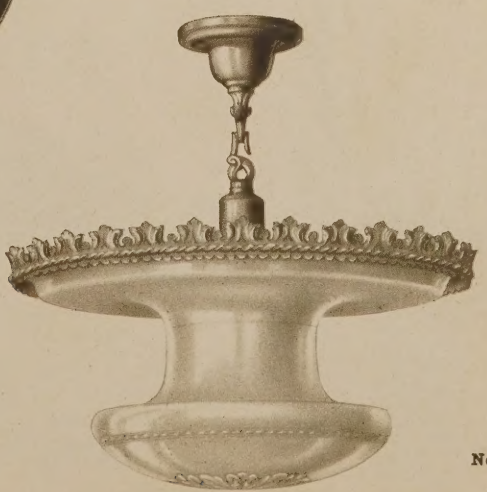
Reflector—White
Porcelain Enameled
With Moulding Ivory



No. H896

1. (Socket) — New Fixture Supporting Socket, exterior threaded, providing simple means for positioning the reflector that controls the amount of upward or downward light. . . . . .

2. (Globe Holder) —Spring type, concealed, simplest form of globe holder.

3. (Reflector)—Porcelain Enamel White Reflector. Adjustable, controlling and redirecting all of the upward light rays.

4. (Globe)—A specially shaped globe to produce maximum light output immediately around the lamp. The extended lower portion reduces glare and conceals the bright neck from sight. The top of the extended portion, where dust will settle, is shaped so that it cannot be seen and absorption therefrom will be negligible.

5. (Mazda Lamp) —Lamp positioned high in this unit so that downward light distribution is uniform throughout the lower radius wherein all of the light from the lamp below the holder is diffused and reflected to a useful plane. The light that is usually lost in a globe holder, approximately 7%, is utilized for ceiling illumination and also prevents shadow from the opaque reflector. This construction provides a useful feature in keeping the lamp base open and cool.

NEW **BRASCOLITE**
PATS PENDING TRADE MARK REG.

Packed one to a carton.

1. (Socket)—The New Guth Socket provides an insulated and safe fixture support; eliminates bridges, hickeys, screws and saves time.

2. (Reflector)—White porcelain enameled reflector maintaines efficiency for all time.

3. (Collars)—Collars supporting bowl and reflector independently allow for adjustments.

4 (Knockout)—Switch knockout for standard pull switches.

5. (Bowl)—Pressed rugged diffusing glass bowl, formed to reduce glare and to develop maximum light output.

6. Opening in bottom of bowl to permit direct downward rays—prevents accumulation of dust and bugs, and permits free circulation of air around the lamp.

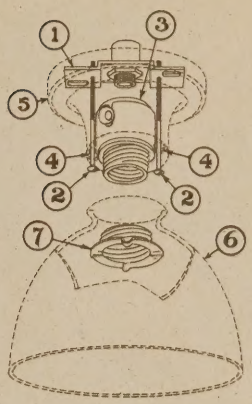
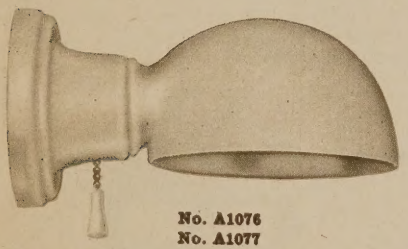
PORCELAIN AGLITE ENAMEL

PATENTED—TRADE MARK REG.



Method of Installing Aglites and Bracket Types

Bridge (No. 1) is attached to any standard outlet with locknut furnished.
Attach house wires to porcelain socket (No. 3) and clamp it in canopy (No. 5).
Place canopy in position towards ceiling (or wall) with screws (No. 2), projecting through keyhole slots (No. 4).
Turn canopy to right and tighten screws (No. 2) with screw driver.
Glass shade (No. 6) is then placed over Bakelite screw collar of socket and held in position by patented, internal threaded collar (No. 7).
When light is installed no metal parts are visible.



No. A1076
No. A1077

The AGLITE line of porcelain enamel units is ideal for use wherever cleanliness and sanitation are paramount. They harmonize perfectly with the interiors of white tiled bathrooms, kitchens, hospitals, laboratories, etc.
AGLITE canopies are stamped from a single piece of heavy gauge Armco iron and three coats of **permanent** porcelain enamel are then fused on at 1,600 degrees Fahrenheit in our electric porcelain enameling furnaces. This process insures a smooth surface that is self-insulated and is guaranteed not to check, peel, tarnish, rust or discolor.
No metal parts are visible, as AGLITES require no projecting set screws. The pure white glass shade is attached by means of a concealed metal screw collar which holds the glass firmly in place yet permits its adjustment in the bracket types so that the light may be directed wherever required.
A damp cloth rubbed once over the fixture makes it bright and clean.
Installation is made direct to house wires in five minutes with only screw driver and pliers. No canopy insulator is required.
No splicing, soldering or taping of wires is necessary.
Standard colors—White, Old Ivory and Gray.
All parts furnished ready for installation.

The New Guth Fixture Supporting Socket Saves Half Your Installation Time

(U. S. and foreign patents pending)

This simple, substantial improved socket—the Guth support for electrical fixtures and Mazda lamps of standard bases—is a valuable electrical invention.

A twist of the wrist, splicing the wires, and the job is done!

In actual demonstration tests it carried 236 pounds—that's a factor of safety for any job.

A metal supporting cap carries the insulated, threaded socket housing through two steel screws, properly spaced and insulated from live parts. The fixture is adjustable and completely insulated. Lamp-filament position controllable on reflector-type fixtures.

The ⅜″ pipe size cap allows attachment of the flexible asbestos polarized wires either through or beside it. No hickeys, bridges, supporting screws or canopy insulation needed. Another Guth Fixture Advantage.

AVERY LIBRARY
COLUMBIA UNIVERSITY

New Brascolite and New Guthlite will make lighting history. Greater light output and still lower prices make these two units the outstanding luminaires for business buildings. They are made in sizes and styles to fit all needs.

Fewer units are needed for a given area, making them the lowest cost light controlling units for all types of installations.

THE EDWIN F. GUTH COMPANY, St. Louis, Missouri, U. S. A.
